

Rawaan

an Urdu learning game
for children with Dyslexia

edsistive.io/rawaan

About

Rawaan is the first Urdu-based remedial therapy tool for dyslexia, delivered through an immersive gaming experience for children in primary schools.

Features

ADAPTIVE

Automatically adjusting the game's pace and difficulty in real-time according to your child's level.

MULTI-SENSORY

Pushing your child to use 4 senses (seeing, hearing, touching and speaking) in order to recognize the Urdu alphabet.

SEQUENTIAL

Moving from smaller units of language to larger in a pre-defined order set by Urdu experts.

Features

MONITORING

In-Depth monitoring of your child's performance and comparing progress over time.

MULTIPLE PATHS

Rawaan is designed to be played independently by children, and also allows flexibility for you to set the pace for your child.

SCREENING

Screening your child from time to time and keeping a record of signs.

Get Started

You can benefit from Rawaan if you:

- ✧ Have a child diagnosed with Dyslexia
- ✧ Have a child who is not diagnosed but who simply struggles with Urdu
- ✧ Are a teacher with students who struggle with Urdu
- ✧ Are a remedial therapist working with a Dyslexic child
